

PT-201WH

PLASTIC MULTI-CATCH MICE TRAP — WHITE

Milky translucent PP body / twin one-way entry ramps / no winding or manual reset

OPEN PRODUCT VIEW / TWIN ENTRY MECHANISM

PRODUCT-SPECIFIC CONSTRUCTION

TWIN ENTRY PATHS

One entrance at each end supports travel from either direction along a wall run.

ONE-WAY METAL RAMPS

Two mirrored perforated plates tip inward, then return to restrict the exit route.

MILKY TRANSLUCENT LID

The capture chamber can be checked with the lid closed, reducing unnecessary opening.

NO WIND-UP MECHANISM

Gravity-operated entry plates are ready once inspected and the lid is fully closed.

FULL-WIDTH SERVICE LID

The single rear-hinged lid opens for chamber access, release and cleaning.

ONE-WAY ENTRY DETAIL

Perforated metal ramp / enclosed return path / open capture chamber

ALWAYS-READY, LOW-PROFILE MONITORING

PT-201WH combines two inward-tipping metal entry plates with a translucent central holding chamber. There is no external winding knob or separate setting step: inspect both plates, close the lid and place the unit correctly.

TYPICAL INDOOR PLACEMENTS

Wall edges, utility spaces, warehouses and other dry indoor locations with confirmed mouse travel. Keep both short-end entrances clear.

TARGET	MATERIAL	PRODUCT SIZE	UNIT WEIGHT	SUPPLY
MICE	PP PLASTIC	27 x 15 x 5.4 CM	330 G / PC	BULK PACKING

STANDARD SUPPLY FORMAT

BULK PACKING / 12 PCS PER MASTER CARTON

Loose product in the master carton; no individual colour box in this specification.

LIVE-CAPTURE DEVICE

Inspect frequently; handle captures under local welfare requirements.

BULK SUPPLY & EXPORT PLAN

Standard product data, master-carton specification and door-height-based loading plan.

12 PCS

PER MASTER CARTON

A TRUE BULK-PACKING FORMAT

PT-201WH is supplied as loose product in the master carton. Individual colour boxes and other retail presentations are separate configurations and require new carton and loading calculations.
