LONG-SIDE COCKROACH GLUE MONITOR

Fold-to-form paper trap with twin low crawl approaches and a sheltered adhesive floor

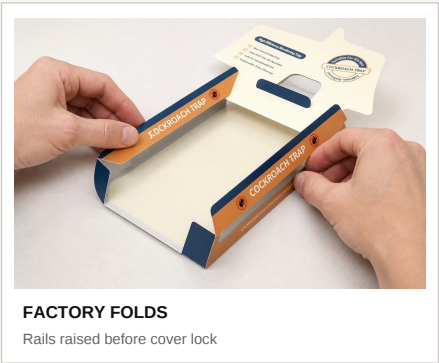

CURRENT PRODUCT FORM / PAPER-AND-GLUE MONITOR

PRODUCT-SPECIFIC CONSTRUCTION

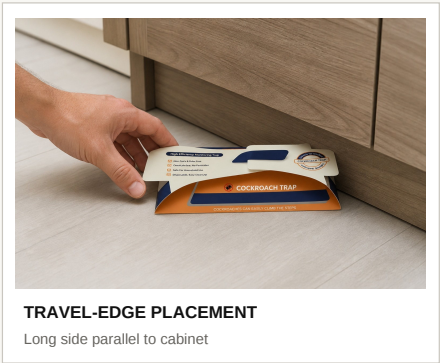

- TWIN LONG APPROACHES**
 Raised navy-and-orange step rails run along both long sides so the assembled monitor can present a low approach beside a travel edge.
- SHELTERED ADHESIVE FLOOR**
 The broad paper cover sits above the central glue area while the long approaches remain open for entry and inspection.
- CENTRAL PAPER LOCK**
 A single die-cut tongue and matching slot hold the cover in its assembled position without a separate fastener.
- FIVE-PIECE RETAIL PACK**
 The declared packing basis is five traps per color box and 48 color boxes per master carton.
- PAPER + GLUE FORMAT**
 The one-piece scored board ships compactly, then folds into the finished monitor at the point of use.
