WINDOWED LOW-PROFILE COCKROACH MONITOR

Long paper tunnel with a broad side window, open ends and a central adhesive floor

CURRENT PRODUCT FORM / PAPER-AND-GLUE MONITOR

PRODUCT-SPECIFIC CONSTRUCTION

BROAD SIDE WINDOW

The long rectangular opening keeps the sheltered floor visible and provides a low side approach when placed beside a travel edge.

OPEN-END ACCESS

Shaped openings at both ends remain unobstructed after the roof and end returns are folded into position.

LOW PAPER TUNNEL

The long roof and low wall folds create a shallow monitoring chamber over the central adhesive floor.

CENTRAL TONGUE & SLOT

One centered paper tongue engages the matching roof slot to hold the assembled form without a separate fastener.

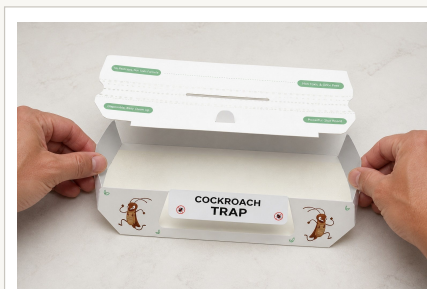

TEN-PIECE RETAIL PACK

Ten flat traps are packed in each color box; 48 color boxes form the declared master-carton pack.

WINDOWED TUNNEL
